Pete-

Just a note of appreciation for the lighting upgrade project done by Retrofit at our hangar.

The lighting at our facility was improved tremendously by the upgrade to fluorescent lighting, even more than we expected. We have received many favorable comments. And a quick before-and-after comparison of our electric bills shows about a 17% savings.

The men performing the work were efficient, professional, and cordial; and the project was finished quickly with only minor disruption to our operation.

Thank you for proposing the project and for your support during and after installation.  
I would definitely recommend The Retrofit Companies to anyone considering a similar upgrade.

Cheers,

Brian Sherwood
