ISD 111

Subject: Lighting project

In regards to the lighting upgrade project your company did for us last summer. I would like to thank you and all involved with this project. Wow what a difference it made in the pool area. We have heard nothing but compliments from staff and visitors about how much better the lighting is in the pool. During the time of the project our school was also under construction for remodeling and additions were added. I was very impressed with how accommodating and how quickly you were able to complete this project, the time line was small and things had to happen quickly and they did! I am confident we will see the projected savings and that the project will pay for itself. Six months have passed and to date we have not had to replace a bulb or ballast yet. The electricians also need to be recognized for their professionalism, they kept me informed and were also very accommodating with our schedule as well. Great job.

On a separate note the district also uses The Retrofit Companies for our recycling needs. In the past it was time consuming to locate and keep track of who recycled what and most times we had to place several calls to get a certificate of recycling. With Retrofit it is a one stop shop and we receive the certificates of recycling and it makes things so much easier.
